

How the Games Work

Texas Hold 'em Bonus Poker

Keep it fun.

Learn how the games work before you play.

To win at Texas Hold'em Bonus you must be the player with the best five-card poker hand at the end of the game. You only have to beat the dealers' hand to win, not the other players at the table. Players also have the option of putting up a bonus jackpot wager.

Players and the Dealer are dealt two initial cards face-down. The Dealer will deal 5 community cards which are used by the Player and the Dealer to make the best possible 5 card Poker hand. The Player and the Dealer may use any combination of the 2 down cards, and the 5 community cards to make the best possible hand.

Playing Against the Dealer:

Players must make an Ante wager to participate in the game. Players must place a Flop wager if they wish to play their hand against the dealer. The Flop wager must be double the Ante wager. If the Player decides not to place the Flop wager, they must Fold and forfeit the Ante wager. Players will have an option to place additional wagers that are equal to the Ante wager on the Turn and River cards.

Ante Payout

The Flop, Turn, and River wagers are paid even money (1 to 1) when the Player's hand beats the Dealer hand. If the Ante wager contains a straight or better, it will be paid even money (1 to 1), otherwise it is a Push.

If the Dealer hand beats the Player's hand, the Ante, Flop, Turn, and River wagers lose.

Hand Value	Bonus Payout
Winning Straight or Better	1 to 1

Bonus Jackpot Paytable

Players may make an additional wager on the Bonus Jackpot if they have a wager in the basic game. Players wagering on the Bonus Jackpot are playing against a set payable.
